Slide 1: Title

**Intreactive Digital Portfolio Using Front End
Development**

Naan Mudhalvan Course
(HTML | CSS | Java)

Slide 2: Introduction

- A digital portfolio is an online showcase of skills and projects.
- Built using HTML, CSS, and Java to demonstrate web development abilities.
- Helps learners present their work professionally.

Slide 3: Problem Statement

- Need for a platform to display coding skills and projects learned in the course.
- Lack of practical experience in building a complete, interactive website.
- Goal: Create a personal portfolio to enhance learning and professional presence.

Slide 4: Technologies Used

- HTML**: Structure and content of the portfolio.
- CSS**: Styling and layout for visual appeal.
- Java (JavaScript)**: Interactive elements and dynamic content.

Slide 5: Features of the Portfolio

- Responsive design for all devices.
- Sections for About Me, Skills, Projects, Contact.
- Interactive elements like buttons and form validation.

Slide 6: Benefits

- Demonstrates practical application of course skills.
- Builds confidence in web development.
- Provides a professional online presence for job or internship opportunities.

Slide 7: Conclusion

- Digital portfolio integrates learning into a tangible project.
- Serves as a foundation for further web development skills.
- Encourages continuous improvement and self-promotion.
